product

ODYLIFE, the first 100% biosourced scale inhibitor

by ODYSSEE Environnement

Developed by and exclusively available from ODYSSEE, ODYLIFE is the first scale inhibitor with a 100% biosourced active ingredient.

This product is proof that it is possible to achieve sustainable, truly green industrial water treatment without using petrochemicals.

After 11 years of R&D, ODYSSEE can now offer this unique alternative, which is both effective and sustainable, and which delivers superior performance compared to an equivalent dose of petrochemical-based products.

Products:

- ODYREF G 55 and ODYREF G 56: **comprehensive products** packed with several of ODYSSEE's innovative technologies.
- ODYPURE G 815, with dosage amounts suitable for **osmosis units**, ensures your equipment operates correctly and maintains its performance over time.

Benefits:

- **No adaptation of existing equipment or processes required.** Simply replace the traditional mining resource- or petrochemical-based products with the 100% biosourced active ingredients contained in ODYLIFE's scale inhibitor products.
- **No price barrier:** ODYSSEE ensures its products are affordable for everyone by adapting them to market prices.

How is ODYLIFE a hydroethical product?

ODYLIFE combines high performance and environmental care by **equaling or even boosting performance** while substantially reducing your industrial footprint.

The life cycle analysis shows that ODYLIFE has **85% less environmental impact than standard products.**

- **Reduced carbon footprint:** ODYLIFE's 100% biosourced raw ingredient is regrown with each growing cycle. Unlike traditional products that use petrochemicals and mining resources, ODYLIFE's carbon impact is mostly biogenic, meaning it naturally has a neutral environmental impact.
- **One hectare of ODYLIFE crops replaces one tonne of phosphates or polyacrylates.**
- **Reduced water footprint:** fewer chemical active ingredients in the system and lower water consumption.
- **Reduced energy footprint** (fossil-fuel, electricity, gas, etc.).

ODYLIFE is certified by **Solar Impulse**, a foundation that lists 1,000 effective products and shows that innovation can provide reliable alternatives that benefit the environment.
